InTime Solutions Announces ISE Goes Live with Six Customers in California and New York

Vancouver, B.C. Canada, July 29, 2008 — InTime Solutions is pleased to announce that six customers have gone live with ISE, InTime’s next-generation employee scheduling and deployment enterprise software solution built specifically for managing public safety personnel. The latest California customers include the San Bernardino County and Orange County Probation Departments, the Stanislaus County Sheriff’s Department, and the San Leandro and Santa Monica Police Departments. The Albany, New York Police Department rounds out the six newest ISE users.

“There’s growing interest in ISE in California and elsewhere as the challenging financial climate over the last few years means that public safety agencies have to do more with less,” said Harry Dollard, president and CEO of InTime Solutions. “ISE is designed to help administrators be more efficient and productive in their scheduling work, while also helping keep overtime and other costs under control.”

Built on an enterprise-class IT infrastructure, ISE has proven to be reliable and scalable for large deployments while also being able to work in smaller organizations. It is the powerful and proven law enforcement software tool that takes care of building, maintaining and controlling the scheduling of an organization’s workforce, no matter how large that organization is or how the operation is run.

About InTime Solutions Inc.

Founded in 1996, InTime Solutions is a scheduling product leader in the public safety marketplace. We develop software and service solutions to more efficiently manage the allocation and deployment of your workforce. Our clients rely on us to improve utilization of personnel and to integrate the associated information with other systems within their organization.
